## Best for Babies

The Best Milk For You CERTIFIED MILK

EVERY BOTTLE bears the certificate of the El Paso County Medical Society. They certify to our milk just as your bank will to your check if you have the money.

Their certificate means that their Milk Commission has carefully inspected our dairy, our barns, our cows and our milkers and has found them up to the high standard required. It means that their chemist, the Crouse Laboratories, make frequent chemical and bacteriological examinations of the milk.

It means that not only is every cow tested twice a year by the United States Government for tuberculosis, as are all other cows in our dairy, but that the society's veterinarian (not ours) inspects every two weeks, each cow producing certified milk to insure their perfect health at all times. Doesn't that mean something to you?

We guarantee our certified milk will, if properly cared for by the customer, keep sweet for a week or more, even in this climate. Your physician will tell you that impure milk is the source of more disease than any other impure food. Some milk is good and some bad. Certified milk is uniformly good. There is health and economy in its use.

Isn't That the Kind of Milk to Give Your Baby?

ASK YOUR DOCTOR!
